## WHY NOT STOCK **BRONX RIVER?**

Fifteen Miles of Sport Within Thirty Pound Lunge Known to 50 Minutes of Forty-second Street.

By JAMES OWEN.

per stretches of the river the water is now clear and sparkling.

For the greater part it is a shallow running stream, but there are deep sections and holes that should offer possibilities for trout stocking. There has been discussion about stocking Ashokan reservoir, which is all right, but I believe the Bronx River is an opportunity right close to the city. At Scarsdale, there are secluded pools in hemlock woods. These should be good waters for trout or other same fish, and the missty, all three, are fish that 'break water' and endeavor to cast the book or other lure by violent and determined shaking of the head.

In connection with the same theory I advanced as to the shishing at a line or other obstruction by these long "lever-like" fish. I think it is worth consideration to bear in mind that the members of this family are in the habit of rushing are in the habit of rushing are in the same theory I advanced as to the sinshing at a line or other obstruction by these long "lever-like" fish. I think it is worth consideration to bear in mind that the members of this family are in the habit of rushing are in the same theory I advanced as to the sinshing at a line or other obstruction by these long "lever-like" fish. of the Catskill system. Recently in the pacity and to shake with terrific vio-course of tuning up operations of the lenon.

of what may be expected, as it brought to view stretches of clean, sandy bottom, even in the Williamsbridge section.

There are plenty of men living in The Bronx who remember the Bronx River in its natural purity; fishing and swimming in it are vivid recollections of their boyhood days. In those days there was a colony of French people at Williamsbridge, the section around Gun Hill road or East 210th street. In recent years it has been difficult to picture this section of Greater New York as the Arcadian village of earlier days, with the white cottages, flower gardens running down to the river, boating and fishing. A Sunday morning excursion than the New York Central, and it brought the air say to the pound pickerel or a four or five pound pickerel ash, could exist in its waters. Practically an open sewer. Its peetliential con-dition led to the creation of the parkway reservation.

The river channel will be deenened and suproved the better to carry off flood waters, and at certain points small dams r cascades will be built to maintain uni-

ing dams or cascades in the Brong River it is possible that some at tention could be given to naturalistic design that would result in aeration and ser attractive conditions for trout.

Any ideas that Rod and Gun readers may have on this subject should be made public. A public park containing over diffeen miles of natural river within its borders is to say the least unusual, and some of the best parts of this park found with the pike in some manner stuck in its mouth, part of it protruding

are located within forty to fifty minutes stuck in its mouth, part of it protruding fourney from Forty-scoond street it seems to me that it is an opportunity that should not be overlooked by those interested in fishing and outdoor life.

Some idea of the possibilities of this park water in which to run, are far less likely to break water or even show above the surface than somewhat smaller and opportunity to break water and opportunity to break water or even show above the surface than somewhat smaller and opportunity of Wisconsin to be safely all the land has been surface than somewhat smaller and opportunity of Wisconsin to be surface than somewhat smaller and opportunity to break water or even show above the surface than somewhat smaller and opportunity of Wisconsin to be sufficiently all the land has been sufficiently deep sufficien ever it. Practically all the land has been acquired by the Bronx Parkway Com-

It seems to me that the river in this water only when hooked in a certain locality offers great possibilities for stocking with trout and thereby providing sport for many people. It may be sixed that being so close to the city it of the mouth, where it annoys them and probable views. ied that being so close to the city it would be fished out. The answer is that it could be done under proper the old veterans will smash into the air regulations and the cooperation of sports and their mouths look almost as big men. I am of the opinion that it could when distended as a bucket, the gills men. I am of the cointon that it could spread wide until they show flaming red, trooks I know of in the Adicondacks and, my, how they do rattle that spoon! since automobiles have been in vogue as a means of setting to them. Even there means of setting to them. Even there a absolutely closed season for a period years has been put on such brooks The problem is to educate sportsmen ecoperate with the authorities. One at menace to fish and game everyethics"—the failure of people to realize that when they break the regulations or take the full bag limit allowed by law they are really taking more than their care and are thereby lessening or com-

#### ONCE NOTED FOR TROUT THEIR LEAPING ABILITIES

By NATURE PACTOR.

Trout and other fishing in the Bronx River, even within the city limits, is among the possibilities of the development of the Bronx River Parkway Reservation.

Up in the Westchester county hills, in the neighborhood of Valhalla, the Bronx River has its source. Between roughly parallel ridges it flows down the valley in which are located White Plains. Hartsdale, Scarsdale, Tuckahoe, Bronx-ville and Mount Vernon, to the New York city line; through Bronx Borough and Bronx Park it finds its way to the Sound, near Cluson's Point.

In the neighborhood of White Plains I have talked with one or two men who recall the days when they took trout from the river. Increasing density of population in the Harlem valley polluted it at the very source, however, and trout do not live, much less thrive, on sewage and factory wastes. In the past two years practically all pollution north of the city line has been stopped by the Bronx Parkway Commission. In the upper stretches of the river the water is now clear and sparkling.

For the greater part it is a shallow shaking of the bead.

I have caught lunge weighing less than thirty pounds with a sucker weigh-ing four pounds in the stomach. I have caught one lunge of approximately Why Not Stock Bronx Rivery caught one linnse of approximately two Commission to restore fish and other aquatic life to the river. Any efforts that sportsmen may make toward stocking and propagation will no doubt meet with a friendly attitude by the commission. With stocking and proper restrictions the Bronx River should provide that these fight very frequently in their these fight very frequently in their conditions. with a friendly attitude by the comma-with a friendly attitude by the comma-with a friendly attitude by the comma-sion. With stocking and proper restric-tions the Bronx River should provide sport and recreation for many people within the next few years.

(either because of defensive armor like a large because of defensive armor like a large Trout or other fry placed in the river should thrive, for they will be regaled with Catskill Mountain water. Kensico reservoir is now filled with Catskill water and its wasteway spills into the Bronx River channel, although this wastage ordinarily is small in amount. At Grassy Sprain there is a wasteway from the Catskill aqueduct through the construction of their teeth make it rather difficult for them to let go such an undesirable object, their jaws being which on occasion the aqueduct may be an undesirable object, their jaws being drained. At Wakefield the river remade to hold anything they once shut ceives a large blowoff pipe from the upon. Hence these fish have the ability Hill View reservoir, which is also part to distend those jaws to tremendous ca-

boarding house, and I have been told that as many as 300 dinners have been told that as many as 300 dinners have been as single Sunday. I have been told also that the fish courses for these dinners were taken from the Bronx River, and although this strains tredulity, there certainly was some fishing in the river. In recent years few living things, and certainly no game which he has regretfully taken into his mouth and which he realizes too late.

practically choked to death by getting in their mouths something too big to swallow and which became fixed in such a manner that they could not disgorge

Muskles That Rattle the Spoons. One of the largest lunge taken in recent years was caught upon a set line.

more active lunge.

ever it. Practically all the land has been acquired by the Bronx Parkway Commission and is open to the public. The peals strongly to me. The river there appears experience and great shyness are difficult to imagine so close to New Tork city.
